python - Best way to replace multiple characters in a ...

Mar 19, 2019 · Late to the party, but I lost a lot of time with this issue until I found my answer. Short and sweet, translate is superior to replace. If you're more interested in functionality over time optimization, do not use replace.. Also use translate if you don't know if the set of characters to be replaced overlaps the set of characters used to replace.. Case in point:
