trigonometry word problems worksheet with answers Question 1 : The angle of elevation of the top of the building at a distance of 50 m from its foot on a horizontal plane is found to be 60 degree.

College Algebra - A Complete Online Course For You

I liked the multiple choice. Overall, I really liked your College Algebra program and wish that I had known of it earlier. Michelle Theriot - October 2019. I found the entire College Algebra course helpful. I have gone back to finish my bachelor degree at the age of 35. I did great in Algebra and Trig in high school but that was so long ago.

Solving SSS Triangles

There can be two answers either side of 90° (example: 95° and 85°), but a calculator will only give you the smaller one. So by calculating the largest angle first using the Law of Cosines, the other angles are less than 90° and the Law of Sines can be used on either of them without

difficulty.
