We have to struggle nowadays to make students read a book, but instead, if the same thing is available on computers or mobile devices children get attracted.

T2 (spin-spin) relaxation - Questions and Answers in MRI

T2 Relaxation Accompanying T1 Relaxation As described in the prior Q&A, T1 relaxation occurs when a spin exchanges energy with its external environment. If such an energy exchange were to affect one of the spins contributing to M_{xy} , both the transverse and longitudinal components of its angular momentum would be randomly changed and it would immediately lose phase relations with other spins.

electromagnetism - How do moving charges produce magnetic ...

Nothing happens to the particle to make it produce a magnetic field as it starts moving: electric and magnetic field are components of the electromagnetic field, which is a single entity, similar to how energy and momentum are components of 4-momentum; in a charged particle's rest frame, the magnetic components vanish, as does its 3-momentum, and only the time-like ones (the ...
