Drag (physics) - Wikipedia

In fluid dynamics, drag (sometimes called air resistance, a type of friction, or fluid resistance, another type of
friction or fluid friction) is a force acting opposite to the relative motion of any object moving with respect to a
surrounding fluid. This can exist between two fluid layers (or surfaces) or a fluid and a solid surface. Unlike
other resistive forces, such as dry friction, which ...

Hydrostatics - Wikipedia

Fluid statics or hydrostatics is the branch of fluid mechanics that studies the condition of the equilibrium of a floating body and submerged body "fluids at hydrostatic equilibrium and the pressure in a fluid, or exerted by a fluid, on an immersed body".. It encompasses the study of the conditions under which fluids are at rest in stable equilibrium as opposed to fluid dynamics, the study of ...
